

NOW ANYBODY CAN DESIGN BOTS

With TruBot Designer, anybody can design bots. Business users who do not have any programming knowledge, have to just record the steps in a particular process using the in-built visual recorder, and TruBot Designer will take care of the rest. It will design the bot for the process at the click of the button! The Smart Library in the TruBot Designer comes with pre-defined components which can be just dragged and dropped to create bots faster. For designing complex bots, business users can collaborate with technical developers, who can fine-tune the system generated code to suit the business requirements. For this, the technical developers are equipped with advanced development options such as standard integrated development environment (IDE) and advanced debugging.

BENEFITS

Easy Codeless Designing

Scale Up Faster

Visual Recorder For Designing

No Training Required

Leveraging Collaboration

FEATURES

Technology Compatible

Offers high compatibility with web and desktop applications as well as legacy mainframes, character user interfaces, and remote applications.

Standard Development Environment

Standard IDE built on Microsoft Visual Studio for programming complex processes and does not require any special training for developers.

Comprehensive Library

Drag and drop pre-defined components available from rich in-built library to create own bots.

Version Control

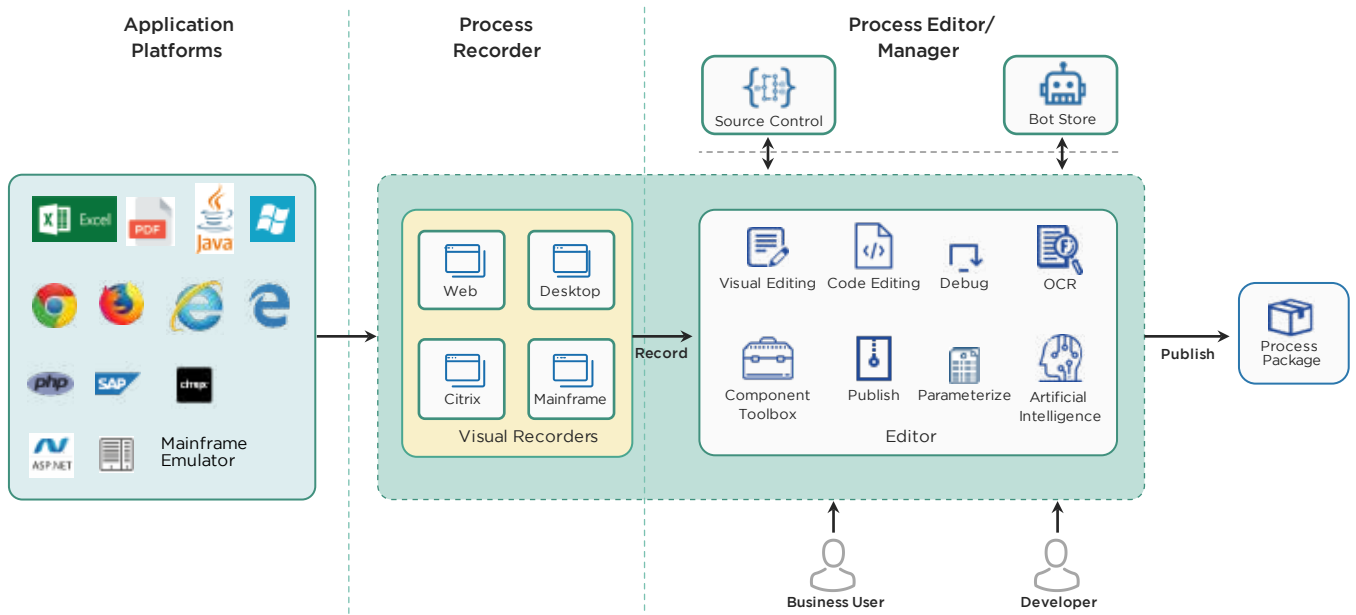

Bot development under strict version control. Offers centralized repository for maintaining version control, logs, and credentials.

Fast Quality Checks

Advanced debugging feature to create error free bots. Allows testing and code editing in a development environment.

ARCHITECTURE

“Datamatics focuses on the ease of bot building and deployment through its TruBot Designer, which facilitates bot creation using simple, intuitive recorders coupled with drag-and-drop features.”

About Datamatics TruBot

Datamatics TruBot is a versatile, multi-skilled bot that automates a range of repetitive and rule-based processes without any manual intervention. TruBot has 95+ customers globally and has automated more than 800 processes across multiple industries.

About Datamatics

Datamatics provides Intelligent Solutions for data driven businesses to increase productivity and enhance customer experience. The company’s portfolio of service offerings spans across Information Technology Services, Business Process Management, Engineering Services and Big Data & Analytics all powered by Artificial Intelligence. It has established products in Robotics Process Automation, Advanced Analytics, Business Intelligence and Automated Fare Collection.
